

## COURSE DESCRIPTION

### 14XX SERIES LESS LETHAL LAUNCHER ARMORER'S COURSE

The use of 40mm launchers by law enforcement has significantly increased across the country as departments realize the safe and effective less lethal benefits they offer. This course will ensure the student is able to perform up to Level Three maintenance on the LMT 37mm and 40mm 14XX series Single launchers.

#### COURSE OVERVIEW

This course uses PowerPoint, video and hands-on instruction to guide the students through the process of working on three different classes of launchers. Normally held to a 15 to 1 student/teacher ratio, each class ensures every student receives the personal attention required to master these skills.

As there are four different levels of maintenance on LMT launchers, students can expect to be able to do the following:

- Break the launcher down into three main groups
- Disassemble each group into the functional subgroups
- Inspect the parts and components for wear, damage or breakage
- Replace parts as needed, reassemble and test fire
- Identify repair work that requires a Level Four service and understand how to arrange that

The Defense Technology Training Academy will provide the tools necessary to accomplish the course work. Students will also be given a list of tools they will need to buy to accomplish this work once they return to their work location.

#### COURSE BENEFITS

This course is designed to prepare all students to manage the LMT 14XX series Single launchers.

Students that successfully complete this course will:

- Receive a list of needed tools for their work site
- Be able to inspect the launchers for wear, damage and poor function
- Be able to disassemble, inspect, repair and reassemble the launcher
- Be able to identify repairs requiring factory support

## ADDITIONAL DETAILS

There are no prerequisites for this class. It entails following group presentation and directed instruction addressing the disassembly and reassembly of firearms. Students will have an easier time understanding the mechanical aspects of this work if they have prior experience of working on firearms. The Defense Technology Training Academy trains only sworn law enforcement officers, correctional personnel, state-licensed security personnel (OC only), or active military personnel.

#### REQUIRED EQUIPMENT

Bring at least one of these launchers:

- LMT 37mm / 40mm 14XX series single launcher
- Cleaning gear for the launcher

#### OPTIONAL/RECOMMENDED EQUIPMENT

N/A
