Byrna's Law Enforcement & Private Security Train-the-Trainer course is an 8-hour POST-certified program that uses a skills-based assessment to certify instructors in the proper deployment of Byrna's .68 caliber launchers. The course includes a review of use-of-force principles and relevant case law, ensuring instructors are well-versed in legal considerations. Participants will also engage in reality-based training scenarios that simulate real-world use-of-force incidents. Students will also have the opportunity to familiarize themselves with all Byrna launchers, including trouble shooting and deployment options Byrna .68 caliber launchers offer.
