

DIGITAL WARFARE

THE CYBER THREATS TARGETING FIRST RESPONDERS

This officer safety course is designed to educate and empower attendees to understand the cyber threats facing first responders and how to protect themselves, their agencies, and the communities they serve.

TRAINING HIGHLIGHTS INCLUDE:

- ✓ Understand the current cyber threat landscape targeting first responders
- ✓ Identify common cyber attack vectors: phishing, ransomware, malware, and social engineering
- ✓ Learn best practices for strong passwords, multi-factor authentication, and account security
- ✓ Incident response basics: what to do before, during, and after a cyber incident
- ✓ Real-world case studies and practical defense strategies
